Threat Modeling

Call to Action

After learning about threat modeling, put it to action using this Call to Action document.

In this document you can find actionable tasks that will help you conduct an effective and fruitful threat modeling.

1. Conduct a threat modeling meeting

   This meeting should take place either at the beginning of a project or after major changes, and of course – after a security incident. Be the supervisor of the meeting, and assign a member of them to summarize the topics raised.

   The meeting will take place at _____

   The participants are _____

2. Decide on the threat modeling methodology

   The methodology used is: (circle the methodology selected)

   STRIDE \ PASTA \ DREAD \ Attack tree \ CVSS \ Other _____

3. Select the threat modeling tool used.

   The tool used to describe the threat modeling is: (circle the tool selected)

   MS Word \ Google Docs \ TMT \ Threat Dragon \ Other _____

4. Write down the threat modeling summary.

   The threats identified are: _____

   _____

   _____

   _____

   _____
